## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17, 18, 20-25, 28-32, 34, and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by Shyr et al. USP 5,743,375.

See the previously attached marked up cover sheet and figure 2 of Shyr et al. depicting the claimed features.

### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 19 and 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shyr et al. USP 5,743,375.

Shyr et al. teach the claimed invention except for having the conveyor integrated into the floor and using a hydraulic means to lift his chain conveyor. In both instances, it would have

Art Unit: 3651

been an obvious matter of design choice as to what type of known lifting device is used or on what type of surface the device is placed based on the exact design parameters of the specific invention. Such design parameters would depend on the space available for the device, the weight of the articles and the power required to raise the chains are examples of these considerations which do carry any patentable weight.

***Allowable Subject Matter***

4. Claims 26 and 27 are allowed.

***Response to Arguments***

5. Applicant's arguments filed June 14, 2007 have been fully considered but they are not persuasive. The mere claiming of a "gas turbine" in front of a conveyor does not add an additional patentable departure from the original rejection. Since the claim is not positively reciting a gas turbine, one of ordinary skill in the art could construe the device of Shyr et al. is capable of conveying a gas turbine, albeit a smaller version than what the examiner believes is intended by the applicant. The same argument holds true for the method claims.

*Conclusion*

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
